

UNIT-IV

INTRODUCTION TO FINANCIAL ACCOUNTING

CONCEPTS

1.1 History of Accounting:

Accounting is as old as civilization itself. From the ancient relics of Babylon, it can be proved that accounting did exist as long as 2600 B.C. However, in modern form accounting based on the principles of Double Entry System came into existence in 17th Century. Fra Luca Paciolo, a Franciscan monk and mathematician published a book *De computis et scripturis* in 1494 at Venice in Italy. This book was translated into English in 1543. In this book he covered a brief section on 'book-keeping'.

1.2 Origin of Accounting in India:

Accounting was practiced in India thousands of years ago and there is a clear evidence for this. In his famous book *Arthashastra* Kautilya dealt with not only politics and economics but also the art of proper keeping of accounts. However, the accounting on modern lines was introduced in India after 1850 with the formation of joint stock companies in India.

Accounting in India is now a fast developing discipline. The two premier Accounting Institutes in India viz., Chartered Accountants of India and the Institute of Cost and Works Accountants of India are making continuous and substantial contributions. The International Accounting Standards Committee (IASC) was established as on 29th June. In India the 'Accounting Standards Board (ASB)' is formulating 'Accounting Standards' on the lines of standards framed by International Accounting Standards Committee.

2. BOOK-KEEPING AND ACCOUNTING

According to G.A. Lee the accounting system has two stages.

1. The making of routine records in the prescribed form and according to set rules of all events which affect the financial state of the organization; and
2. The summarization from time to time of the information contained in the records, its presentation in a significant form to interested parties and its interpretation as an aid to decision making by these parties.

First stage is called Book-Keeping and the second one is Accounting.

Book – Keeping: Book – Keeping involves the chronological recording of financial transactions in a set of books in a systematic manner.

Accounting: Accounting is concerned with the maintenance of accounts giving stress to the design of the system of records, the preparation of reports based on the recorded data and the interpretation of the reports.

Meaning of Accounting

Thus, book-keeping is an art of recording the business transactions in the books of original entry and the ledges. Accountancy begins where Book-keeping ends. Accountancy means the compilation of accounts in such a way that one is in a position to know the state of affairs of the business. The work of an accountant is to analyse, interpret and review the accounts and draw conclusion with a view to guide the management in chalking out the future policy of the business.

2.2 Definition of Accounting:

Smith and Ashburne: “Accounting is a means of measuring and reporting the results of economic activities.”

R.N. Anthony: “Accounting system is a means of collecting summarizing, analyzing and reporting in monetary terms, the information about the business.

American Institute of Certified Public Accountants (AICPA): “The art of recording, classifying and summarizing in a significant manner and in terms of money transactions and events, which are in part at least, of a financial character and interpreting the results thereof.”

Thus, accounting is an art of identifying, recording, summarizing and interpreting business transactions of financial nature. Hence accounting is the **Language of Business**.

2.3 Branches of Accounting:

The important branches of accounting are:

1. **Financial Accounting:** The purpose of Accounting is to ascertain the financial results i.e. profit or loss in the operations during a specific period. It is also aimed at knowing the financial position, i.e. assets, liabilities and equity position at the end of the period. It also provides other relevant information to the management as a basis for decision-making for planning and controlling the operations of the business.

2. **Cost Accounting:** The purpose of this branch of accounting is to ascertain the cost of a product / operation / project and the costs incurred for carrying out various activities. It also assist the management in controlling the costs. The necessary data and information are gathered from financial and other sources.
3. **Management Accounting :** Its aim to assist the management in taking correct policy decision and to evaluate the impact of its decisions and actions. The data required for this purpose are drawn accounting and cost-accounting.
4. **Inflation Accounting :** It is concerned with the adjustment in the values of asset and of profit in light of changes in the price level. In a way it is concerned with the overcoming of limitations that arise in financial statements on account of the cost assumption (i.e recording of the assets at their historical or original cost) and the assumption of stable monetary unit.
5. **Human Resource Accounting :** It is a branch of accounting which seeks to report and emphasize the importance of human resources in a company's earning process and total assets. It is concerned with the process of identifying and measuring data about human resources and communicating this information to interested parties. In simple words, it is accounting for people as organizational resources.

3. FUNCTIONS OF AN ACCOUNTANT

The job of an accountant involves the following types of accounting works :

1. **Designing Work :** It includes the designing of the accounting system, basis for identification and classification of financial transactions and events, forms, methods, procedures, etc.
2. **Recording Work :** The financial transactions are identified, classified and recorded in appropriate books of accounts according to principles. This is "Book Keeping". The recording of transactions tends to be mechanical and repetitive.
3. **Summarizing Work :** The recorded transactions are summarized into significant form according to generally accepted accounting principles. The work includes the preparation of profit and loss account, balance sheet. This phase is called 'preparation of final accounts'
4. **Analysis and Interpretation Work:** The financial statements are analysed by using ratio analysis, break-even analysis, funds flow and cash flow analysis.
5. **Reporting Work:** The summarized statements along with analysis and interpretation are communicated to the interested parties or whoever has the right to receive them. For Ex. Share holders. In addition, the accounting department has to prepare and send regular reports so as to assist the management in decision making. This is 'Reporting'.

6. **Preparation of Budget :** The management must be able to reasonably estimate the future requirements and opportunities. As an aid to this process, the accountant has to prepare budgets, like cash budget, capital budget, purchase budget, sales budget etc. this is 'Budgeting'.
7. **Taxation Work :** The accountant has to prepare various statements and returns pertaining to income-tax, sales-tax, excise or customs duties etc., and file the returns with the authorities concerned.
8. **Audit ing :** It involves a critical review and verification of the books of accounts statements and reports with a view to verifying their accuracy. This is 'Audit ing'

This is what the accountant or the accounting department does. A person may be placed in any part of Accounting Department or MIS (Management Information System) Department or in small organization, the same person may have to attend to all this work.

4. USERS OF ACCOUNTING INFORMATION

Different categories of users need different kinds of information for making decisions. The users of accounting can be divided in two broad groups (1). Internal users and (2). External users.

4.1 Internal Users:

Managers : These are the persons who manage the business, i.e. management at the top, middle and lower levels. Their requirements of information are different because they make different types of decisions.

Accounting reports are important to managers for evaluating the results of their decisions. In addition to external financial statements, managers need detailed internal reports either branch division or department or product-wise. Accounting reports for managers are prepared much more frequently than external reports.

Accounting information also helps the managers in appraising the performance of subordinates. As such Accounting is termed as " the eyes and ears of management ."

4.2 External Users :

1. **Investors :** Those who are interested in buying the shares of company are naturally interested in the financial statements to know how safe the investment already made is and how safe the proposed investments will be.

2. **Creditors :** Lenders are interested to know whether their loan, principal and interest, will be paid when due. Suppliers and other creditors are also interested to know the ability of the firm to pay their dues in time.

3. Workers: In our country, workers are entitled to payment of bonus which depends on the size of profit earned. Hence, they would like to be satisfied that the bonus being paid to them is correct. This knowledge also helps them in conducting negotiations for wages.

4. Customers: They are also concerned with the stability and profitability of the enterprise. They may be interested in knowing the financial strength of the company to rent it for further decisions relating to purchase of goods.

5. Government: Governments all over the world are using financial statements for compiling statistics concerning business which, in turn, helps in compiling national accounts. The financial statements are useful for tax authorities for calculating taxes.

6. Public: The public at large is interested in the functioning of the enterprises because it may make a substantial contribution to the local economy in many ways including the number of people employed and their patronage to local suppliers.

7. Researchers: The financial statements, being a mirror of business conditions, is of great interest to scholars undertaking research in accounting theory as well as business affairs and practices.

ADVANTAGE OF ACCOUNTING

The following are the advantages of Accounting... ..

1. PROVIDES FOR SYSTEMATIC RECORDS: Since all the financial transactions are recorded in the books, one need not rely on memory. Any information required is readily available from these records.
2. FACILITATES THE PREPARATION OF FINANCIAL STATEMENTS: Profit and Loss account and balance sheet can be easily prepared with the help of the information in the records. This enables the trader to know the net result of Business operations (i.e. profit/loss) during the accounting period and the financial position of the business at the end of the accounting period.
3. PROVIDES CONTROL OVER ASSETS: Book keeping provides information regarding cash in hand, cash at hand, stock of goods, accounts receivable from various parties and the amounts invested in various other assets. As the trader knows the values of the assets he will have control over them.

4. PROVIDES THE REQUIRED INFORMATION: Interested parties such as owners, lenders, creditors etc, get necessary information at frequent intervals.
5. COMPARATIVE STUDY: One can compare present performance of the organization with that of its past. This enables the managers to draw useful conclusions and make proper decisions.
6. LESS SCOPE FOR FRAUD OR THEFT: It is difficult to conceal fraud or theft etc. because of the balancing of the books of accounts periodically. As the work is divided among many persons, there will be check and counter check.
7. TAX MATTERS: Properly maintained Book keeping records will help in the settlement of all tax matters with the tax authorities.
8. ASCERTAINING VALUE OF BUSINESS: The accounting records will help in ascertaining the correct value of the Business. This helps in the event of sale or purchase of a business.
9. DOCUMENTARY EVIDENCE: Accounting records can also be used as evidence in the court of substantial the claim of the Business. Thus records are based on documentary proof. Authentic vouchers support every entry. As such, courts accept these records as evidence.
10. HELPFUL TO MANAGEMENT: Accounting is useful to the management in various ways. It enables the management to assess the achievement of its performance. The weaknesses of the business can be identified and corrective measures can be applied to remove them with the help of accounting.

LIMITATIONS OF ACCOUNTING

The following are the limitations of accounting... ..

1. DOES NOT RECORD ALL EVENTS: Only the transactions of a financial character will be recorded under book keeping. So it does not reveal a complete picture about the quality of human resources, locational advantages, business contracts etc.
2. DOES NOT REFLECT CURRENT VALUES: The data available under book keeping is historical in nature. So they do not reflect current values. For instance we record the values of stock at cost price or market price, whichever is less. In case of building, machinery etc., we adapt historical cost as the basis. Infact, the current values of Buildings, plant and machinery may be much more than what is recorded in the balance sheet.

3. ESTIMATES BASED ON PERSONAL JUDGEMENT: The estimates used for determining the values of various items may not be correct. For example, debtors are estimated in terms of collectibles, inventories are based on marketability and fixed assets are based on useful working life. These estimates are based on personal judgment and hence sometimes may not be correct.

4. INADEQUATE INFORMATION ON COSTS AND PROFITS: Book keeping only provides information about overall profitability of the business. No information is given about the cost and profitability of different activities of products or divisions.

BASIC ACCOUNTING CONCEPTS

Accounting is a system evolved to achieve a set of objectives. In order to achieve the goals, we need a set of rules or guidelines. These guidelines are termed here as "BASIC ACCOUNTING CONCEPTS". The term concept means an idea or thought. Basic accounting concepts are the fundamental ideas or basic assumptions underlying the theory and practice of FINANCIAL ACCOUNTING. These concepts help in bringing about uniformity in the practice of accounting. In accountancy following concepts are quite popular.

1. BUSINESS ENTITY CONCEPT: In this concept "Business is treated as separate from the proprietor". All the Transactions recorded in the book of Business and not in the books of proprietor. The proprietor is also treated as a creditor for the Business.

2. GOING CONCERN CONCEPT: This concept relates with the long life of Business. The assumption is that business will continue to exist for unlimited period unless it is dissolved due to some reasons or the other.

3. MONEY MEASUREMENT CONCEPT: In this concept "Only those transactions are recorded in accounting which can be expressed in terms of money, those transactions which can not be expressed in terms of money are not recorded in the books of accounting".

4. COST CONCEPT: According to this concept, an asset is recorded at its cost in the books of account. i.e., the price, which is paid at the time of acquiring it. In balance sheet, these assets appear not at cost price every year, but depreciation is deducted and they appear at the amount, which is cost, less classification.

5. ACCOUNTING PERIOD CONCEPT: every Businessman wants to know the result of his investment and efforts after a certain period. Usually one-year period is regarded as an ideal for this purpose. This period is called Accounting Period. It depends on the nature of the business and object of the

proprietor of business.

6. DUAL ASPECT CONCEPT: According to this concept "Every business transaction has two aspects", one is the receiving benefit aspect and the other one is giving benefit aspect. The receiving benefit aspect is termed as

"DEBIT", whereas the giving benefit aspect is termed as "CREDIT". Therefore, for every debit, there will be corresponding credit.

7. MATCHING COST CONCEPT: According to this concept "The expenses incurred during an accounting period, e.g., if revenue is recognized on all goods sold during a period, cost of those goods should also

be charged to that period.

8. REALISATION CONCEPT: According to this concept revenue is recognized when a sale is made. Sale is

considered to be made at the point when the property in goods passes to the buyer and he becomes legally liable to pay.

ACCOUNTING CONVENTIONS

Accounting is based on some customs or usages. Naturally accountants have to adopt that usage or custom.

They are termed as conventional conventions in accounting. The following are some of the important accounting conventions.

1. FULL DISCLOSURE: According to this convention accounting reports should disclose fully and fairly the information. They purport to represent. They should be prepared honestly and sufficiently disclose information which is of material interest to proprietors, present and potential creditors and investors. The Companies Act, 1956 makes it compulsory to provide all the information in the prescribed form.

2. MATERIALITY: Under this convention the trader records important facts about the commercial activities. In the form of financial statements if any unimportant information is to be given for the sake of clarity it will be given as footnotes.

3. CONSISTENCY: It means that accounting method adopted should not be changed from year to year. It means that there should be consistency in the methods or principles followed. Or else the results of a year

Cannot be conveniently compared with that of another.

4. CONSERVATISM This convention warns the trader not to take unrealized income into account. That is why the practice of valuing stock at cost or market price, whichever is lower is in vogue. This is the policy of "playing safe"; it takes into consideration all prospective losses but leaves all prospective profits.

1. Personal Accounts: The account of the person receiving benefit (receiver) is to be debited and the account of the person giving the benefit (given) is to be credited.

Rule: "Debit ---- The Receiver
Credit --- The Giver"

2. Real Accounts: When an asset is coming into the business, account of that asset is to be debited. When an asset is going out of the business, the account of that asset is to be credited.

Rule: "Debit ---- What comes in
Credit --- What goes"

3. Nominal Accounts: When an expense is incurred or loss encountered, the account representing the expense or loss is to be debited. When any income is earned or gain made, the account representing the income or gain is to be credited.

Rule: "Debit ---- All expenses and losses
Credit --- All incomes and gains"

JOURNAL

The first step in accounting therefore is the record of all the transactions in the books of original entry viz., Journal and then posting into ledgers.

JOURNAL: The word Journal is derived from the Latin word 'journ' which means a day. Therefore, journal means a 'day Book' in day-to-day business transactions are recorded in chronological order.

Journal is treated as the book of original entry or first entry or prime entry. All the business transactions are recorded in this book before they are posted in the ledgers. The journal is a complete and chronological (in order of dates) record of business transactions. It is recorded in a systematic manner. The process of recording a transaction in the journal is called "JOURNALISING". The entries made in the book are called "Journal Entries".

The proforma of Journal is given below.

| Date | Particulars | L.F. no | Debit RS. | Credit RS. |
|------------|--|---------|--------------|---------------|
| 1998 Jan 1 | Purchases account to cash account (being goods purchased for cash) | | 10,000/- | 10,000/- |

LEDGER

All the transactions in a journal are recorded in a chronological order. After a certain period, if we want to know whether a particular account is showing a debit or credit balance it becomes very difficult. So, the ledger is designed to accommodate the various accounts maintained by the trader. It contains the final or permanent record of all the transactions in duly classified form. "A ledger is a book which contains various accounts." The process of transferring entries from journal to ledger is called "POSTING".

Posting is the process of entering in the ledger the entries given in the journal. Posting into ledger is done periodically, may be weekly or fortnightly as per the convenience of the business. The following are the guidelines for posting transactions in the ledger.

1. After the completion of Journal entries only posting is to be made in the ledger.
2. For each item in the Journal a separate account is to be opened. Further, for each new item a new account is to be opened.
3. Depending upon the number of transactions space for each account is to be determined in the ledger.
4. For each account there must be a name. This should be written in the top of the table. At the end of the name, the word "Account" is to be added.
5. The debit side of the Journal entry is to be posted on the debit side of the account, by starting with "TO".
6. The credit side of the Journal entry is to be posted on the debit side of the account, by starting with "BY".

Proforma for ledger: **LEDGER BOOK**

TRAIL BALANCE

The first step in the preparation of final accounts is the preparation of trail balance. In the double

entry system of book keeping, there will be credit for every debit and there will not be any debit without credit. When this principle is followed in writing journal entries, the total amount of all debits is equal to the total amount all credits.

A trail balance is a statement of debit and credit balances. It is prepared on a particular date with the object of checking the accuracy of the books of accounts. It indicates that all the transactions for a particular period have been duly entered in the book, properly posted and balanced. The trail balance doesn't include stock in hand at the end of the period. All adjustments required to be done at the end of the period including closing stock are generally given under the trail balance.

PROFORMA FOR TRAIL BALANCE

| 59 | Outstanding rent | Credit | Revenue |

FINAL ACCOUNTS

In every business, the business man is interested in knowing whether the business has resulted in profit or loss and what the financial position of the business is at a given time. In brief, he wants to know (i) The profitability of the business and (ii) The soundness of the business.

The trader can ascertain this by preparing the final accounts. The final accounts are prepared from the trial balance. Hence the trial balance is said to be the link between the ledger accounts and the final accounts. The final accounts of a firm can be divided into two stages. The first stage is preparing the trading and profit and loss account and the second stage is preparing the balance sheet.

TRADING ACCOUNT

The first step in the preparation of final account is the preparation of trading account. The main purpose of preparing the trading account is to ascertain gross profit or gross loss as a result of buying and selling the goods.

Trading account of MR... .. for the year ended

| Particulars | Amount | Particulars | Amount |
|------------------------------|--------|-------------------|--------|
| To opening stock | Xxxx | By sales xxxx | |
| To purchases xxxx | | Less: returns xxx | Xxxx |
| Less: returns xx | Xxxx | By closing stock | Xxxx |
| To carriage inwards | Xxxx | | |
| To wages | Xxxx | | |
| To freight | Xxxx | | |
| To customs duty, octroi | Xxxx | | |
| To gas, fuel, coal, Water | Xxxx | | |
| To factory expenses | | | |
| To other man. Expenses | Xxxx | | |
| To productive expenses | Xxxx | | |
| To gross profit c/d | | | |
| | Xxxx | | Xxxx |
| | Xxxx | | |
| | Xxxx | | |

Finally, a ledger may be defined as a summary statement of all the transactions relating to a person,

asset, expense or income which have taken place during a given period of time. The up-to-date state of any account can be easily known by referring to the ledger.

PROFIT AND LOSS ACCOUNT

The business man is always interested in knowing his net income or net profit. Net profit represents the excess of gross profit plus the other revenue incomes over administrative, sales, Financial and other expenses. The debit side of profit and loss account shows the expenses and the credit side the incomes. If the total of the credit side is more, it will be the net profit. And if the debit side is more, it will be net loss.

PROFIT AND LOSS A/C OF MR... .. FOR THE YEAR ENDED... ..

| PARTICULARS | AMOUNT | PARTICULARS | AMOUNT |
|------------------------------|--------|---------------------|--------|
| TO office salaries | Xxxxxx | By gross profit b/d | Xxxxx |
| TO rent, rates, taxes | Xxxxx | Interest received | Xxxxx |
| TO Printing and stationery | Xxxxx | Discount received | Xxxx |
| TO Legal charges | | Commission received | Xxxxx |
| Audit fee | Xxxx | Income from | |
| TO Insurance | Xxxx | investments | |
| TO General expenses | Xxxx | Dividend on shares | Xxxx |
| TO Advertisements | Xxxxx | Miscellaneous | Xxxx |
| TO Bad debts | Xxxx | investments | |
| TO Carriage outwards | Xxxx | Rent received | xxxx |
| TO Repairs | Xxxx | | |
| TO Depreciation | Xxxxx | | |
| TO interest paid | Xxxxx | | |
| TO Interest on capital | Xxxxx | | |
| TO Interest on loans | Xxxx | | |
| TO Discount allowed | Xxxxx | | |
| TO Commission | Xxxxx | | |
| TO Net profit-----→ | Xxxxx | | |
| (transferred to capital a/c) | | | |
| | xxxxxx | | Xxxxxx |

BALANCE SHEET

The second point of final accounts is the preparation of balance sheet. It is prepared often in the trading and profit, loss accounts have been compiled and closed. A balance sheet may be considered as a statement of the financial position of the concern at a given date.

DEFINITION A balance sheet is an item wise list of assets, liabilities and proprietorship of a business at a certain state.

J.R.bot liboi: A balance sheet is a statement with a view to measure exact financial position of a business at a particular date.

Thus, Balance sheet is defined as a statement which sets out the assets and liabilities of a business firm and which serves to ascertain the financial position of the same on any particular date. On the left-hand side of this statement, the liabilities and the capital are shown. On the right-hand side all the assets are shown. Therefore, the two sides of the balance sheet should be equal. Otherwise, there is an error somewhere.

BALANCE SHEET OF AS ON

| Liabilities and capital | Amount | Assets | Amount |
|-------------------------|--------|--------------------------|--------|
| Creditors | Xxxx | Cash in hand | Xxxx |
| Bills payable | Xxxx | Cash at bank | Xxxx |
| Bank overdraft | Xxxx | Bills receivable | Xxxx |
| Loans | Xxxx | Debtors | Xxxx |

| xxxxxxx | | Goodwill | Xxxx |
| ----- | | Prepaid expenses | |
| Less: | | Out standing incomes | Xxxx |
| Drawings xxxx | Xxxx | | Xxxx |
| ----- | XXXX | | XXXX |

FINAL ACCOUNTS -- ADJUSTMENTS

We know that business is a going concern. It has to be carried on indefinitely. At the end of every

accounting year. The trader prepares the trading and profit and loss account and balance sheet. While preparing these financial statements, sometimes the trader may come across certain problems. The expenses of the current year may be still payable or the expenses of the next year have been prepaid during the current year. In the same way, the income of the current year still receivable and the income of the next year have been received during the current year. Without these adjustments, the profit figures arrived at or the financial position of the concern may not be correct. As such these adjustments are to be made while preparing the final accounts.

The adjustments to be made to final accounts will be given under the Trial Balance. While making the adjustment in the final accounts, the student should remember that "every adjustment is to be made in the final accounts twice i.e. once in trading, profit and loss account and later in balance sheet generally". The following are some of the important adjustments to be made at the time of preparing of final accounts:-

1. CLOSING STOCK:-

(i) If closing stock is given in Trial Balance: It should be shown only in the balance sheet "Assets Side".

(ii) If closing stock is given as adjustment :

1. First, it should be posted at the credit side of "Trading Account".
2. Next, shown at the asset side of the "Balance Sheet".

2. OUTSTANDING EXPENSES:-

(i) If outstanding expenses given in Trial Balance: It should be only on the liability side of Balance Sheet.

(ii) If outstanding expenses given as adjustment :

1. First, it should be added to the concerned expense at the debit side of profit and loss account or Trading Account.
2. Next, it should be added at the liabilities side of the Balance Sheet.

3. PREPAID EXPENSES:-

(i) If prepaid expenses given in Trial Balance: It should be shown only in asset's side of the Balance Sheet.

(ii) If prepaid expense given as adjustment :

1. First, it should be deducted from the concerned expenses at the debit side of profit and loss account or Trading Account.
2. Next, it should be shown at the assets side of the Balance Sheet.

4. INCOME EARNED BUT NOT RECEIVED [OR] OUTSTANDING INCOME [OR] ACCURED INCOME:-

(i) If incomes given in Trial Balance: It should be shown only on the assets side of the Balance Sheet.

(ii) If incomes outstanding given as adjustment:

1. First, it should be added to the concerned income at the credit side of profit and loss account.
2. Next, it should be shown at the assets side of the Balance sheet.

5. INCOME RECEIVED IN ADVANCE: UNEARNED INCOME:-

(i) If unearned incomes given in Trail Balance : It should be shown only on the liabilities side of the Balance Sheet.

(ii) If unearned income given as adjustment :

1. First, it should be deducted from the concerned income in the credit side of the profit and loss account.
2. Secondly, it should be shown in the liabilities side of the Balance Sheet.

6. DEPRECIATION-

(i) If Depreciation given in Trail Balance: It should be shown only on the debit side of the profit and loss account.

(ii) If Depreciation given as adjustment

1. First, it should be shown on the debit side of the profit and loss account.
2. Secondly, it should be deducted from the concerned asset in the Balance sheet assets side.

7. INTEREST ON LOAN [OR] CAPITAL:-

(i) If interest on loan (or) capital given in Trail balance : It should be shown only on debit side of the profit and loss account.

(ii) If interest on loan (or) capital given as adjustment :

1. First, it should be shown on debit side of the profit and loss account.
2. Secondly, it should be added to the loan or capital in the liabilities side of the Balance Sheet.
